Thanks Allison. I will say "around 40" or "generally 40".

Alan--

I think that stat we've used for OR before is 40 original conditions. Counting the # of conditions is a bit more of art than science (depends on how much you choose to tease out the various sub components) so saying something along the lines of "about 40" if you can, may be better.

Allison and Don,

I hope you guys are doing well and are able to dig out. We are getting lots of rain and warm weather but cooler weather is forecasted so we may see some snow next week.

I am putting together a PP presentation for the Tillamook Watershed Council meeting and am sharing with them a history of CZARA in Oregon. Do either of you remember the number of management measures initially identified for OR to address? I do have our Jan 1998 decision letter but am not finding where we articulated that specific number.

Don, thanks for your PP presentation. I am using that format and some of your slides for the Tillamook.

Stay warm.

Alan
